MANAGEMENT REPORT

YEAR ENDED 31 DECEMBER 2024

The Board of Directors presents the management report together with the audited financial statements of the National Bank of Greece (Cyprus) Limited (the "Bank") for the year ended 31 December 2024.

PRINCIPAL ACTIVITY

The main activity of the Bank is the provision of a wide range of banking and financial services. The Bank is a wholly owned subsidiary of National Bank of Greece S.A. ("parent bank").

OPERATING ENVIRONMENT

The operating environment of the Bank is presented in Note 38 of the financial statements.

REVIEW OF DEVELOPMENTS, POSITION AND PERFORMANCE OF THE BANK'S BUSINESS

As presented on page 12 of the financial statements, the profit of the Bank after taxation amounted to \in 13.642.024 (2023: profit of \in 5.605.028).

The main financial highlights for the year are set out below.

	2024	2023	
	€,000	€'000	
Net Interest Income	27.079	14.552	
Net Fee and Commission Income	5.020	3.200	
Other income and net foreign exchange	927	1.161	
Staff Costs	(8.873)	(7.918)	
Other Operating Expenses	(7.170)	(5.823)	
(Impairment charge)/Reversal of impairment for ECL	(2.419)	117	
Profit for the year after tax	13.642	5.605	
Loans and advances to customers (net)	964.389	300.763	
Deposits and other customer accounts	584.815	388.805	
Total Assets	1.197.654	536.559	
Total Equity	225.990	69.571	

	2024	2023
Net Interest Margin (average assets)*	3,1%	3,9%
Cost to Income ratio	48,6%	72,6%
Return on average equity	8,9%	9,7%
Non Performing Exposures ("NPEs") to Gross Loans	1,8%	7,4%
Total capital ratio and Core Equity Tier 1 ratio	22,6%	21,6%

^{*}Average assets refers to the yearly average of all assets bearing interest

Based on the "Agreement and Instrument Transfer" dated 28/03/2024, it was agreed that in exchange for good and valuable consideration comprising the Bank's issue and allotment of 1300 ordinary shares with nominal value $\in 1,71$ per share, all assets and liabilities of NBG SA – Cyprus Branch were to be transferred to the Bank. The transfer was completed on 2 April 2024. Main items transferred included credit facilities and deposits to customers as well as deposits from NBG SA. These amounted to $\in 211$ million, $\in 5$ million and $\in 210$ million respectively. The amount of offbalance sheet items transferred to the Bank amounted to $\in 436$ million. This transaction included non-cash items amounting to $\in 356.264$ under balances with related banks.

MANAGEMENT REPORT (continued)

YEAR ENDED 31 DECEMBER 2024

BRANCH NETWORK

The Bank operates in Cyprus through two branches, in Nicosia and Limassol.

GOING CONCERN

Management has made an assessment of the Bank's ability to continue as a going concern.

Despite the uncertain global economic environment as described in Note 38 of the financial statements, the Board of Directors of the Bank has assessed that the Bank has the ability to continue its operations as a going concern on the basis of the Bank's liquidity and capital adequacy position.

PRINCIPAL RISKS AND UNCERTAINTIES, RISK MANAGEMENT, AND USE OF FINANCIAL INSTRUMENTS BY THE BANK

The Bank is exposed to various risks, the most important of which are Credit Risk, Liquidity Risk, and Market Risk (including interest rate risk and foreign exchange risk). Detailed information relating to the Bank's risk exposures and risk management are set out in Note 39 of the financial statements.

Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Bank. The Bank has adopted a policy of dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from counterparty credit risk. The Bank's exposure and the credit ratings and credit worthiness of counterparties are regularly monitored and the counterparty credit exposure is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits approved by the Bank and which are reviewed and approved at least on an annual basis.

The loan portfolio is assessed on the basis of customer creditworthiness, sector of the economy in which the customer operates and the country of operation and is regularly audited by the Internal Audit department. The Bank's policy regarding the determination of the level of provisions for impairment is described in the summary of significant accounting policies.

Liquidity risk

Liquidity risk is the risk that the Bank is unable to meet current and future payments obligations as and when they fall due. This risk includes the possibility that the Bank may have to raise funding at a higher cost or sell assets at a discount.

Bank assets are mainly funded by deposits. The maturity of the deposits is actively monitored in order to avoid concentration of funding maturities at any point in time. The responsibility for the management of liquidity rests with the Bank's treasury department.

Ultimate responsibility for liquidity risk management rests with the Board of Directors, which has built an appropriate liquidity risk management framework for the management of the Bank's short, medium and long-term funding and liquidity requirements, in order to also ensure compliance with the applicable regulatory limits.

MANAGEMENT REPORT (continued)

YEAR ENDED 31 DECEMBER 2024

PRINCIPAL RISKS AND UNCERTAINTIES, RISK MANAGEMENT, AND USE OF FINANCIAL INSTRUMENTS BY THE BANK (continued)

Market risk

Market risk is the risk of loss from adverse changes in market prices. The Bank is exposed primarily to financial risks emanating from changes in foreign currency exchange rates and interest rates. The ways that these risks are dealt with are analysed below:

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. It arises as a result of timing differences on the interest rate repricing of assets and liabilities. The Bank monitors on a continuous basis the interest rate movements and the repricing or maturity structure of its assets and liabilities.

Currency risk

Currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. It arises from an open position in a foreign currency, creating an exposure to a change in the relevant exchange rate. This may arise from the holding of financial assets in one currency funded by liabilities in another currency.

OPERATING ENVIRONMENT / STRATEGIC TARGETS

Despite the many regional challenges and global uncertainties within 2024 the Cypriot economy has demonstrated strong resilience with the GDP growth rate reaching 3.4%, driven by strong economic activity in professional services, information and communication, tourism and construction but also drawing support from increased domestic demand and labor market stability.

Public debt has continued to be on a declining trend estimated at around 65% of GDP. Cyprus' fiscal performance and robust growth performance has been acknowledged by the rating agencies, exhibited by the fact that Cyprus has been upgraded by the major rating agencies 3 notches above investment grade.

Inflation stabilized at 1.9% in comparison to the 4% for year 2023 and unemployment has been on a declining trend reaching 4.5% in the last quarter from 5.5% in the last quarter of 2023.

The Cyprus banking sector continues to focus on reducing the non-performing exposures being around 6.2% of gross loans at the end of December 2024 as per the Central Bank of Cyprus statistics while the coverage ratio of provisions stood at 62% showing the efforts to further strengthen their balance sheets for absorbing potential shocks.

The Bank remains focused within this challenging environment to grow with high quality lending focused on selected industries in line with the Bank's target risk profile while at the same time monitoring potential escalation or deterioration in the geopolitical situation. The digital and green transitions are within the main priorities of the Bank, in order to safeguard its strength, durability and competitiveness.

MANAGEMENT REPORT (continued)

YEAR ENDED 31 DECEMBER 2024

OPERATING ENVIRONMENT / STRATEGIC TARGETS (continued)

The strategic pillars of the Bank for the medium term are:

- Enhance revenue generation via growth in high quality new lending
- Achieve a lean operating model through further automations and simplification of procedures
- Embedding a holistic ESG framework across the Bank

SHARE CAPITAL

On 29th January 2024 the authorised and issued share capital of the Bank was increased by 35.087.700 ordinary shares of €1,71 each thus the total authorised and issued share capital of the Bank following this increase was €143.295.777.

On 3rd April 2024, following the transfer of assets and liabilities of NBG SA – Cyprus Branch, the authorised and issued share capital of the Bank was increased by 1.300 ordinary shares of €1,71 each, thus the total authorised and issued share capital of the Bank to date was €143.298.000.

On 31st July 2024 the authorised and issued share capital of the Bank was increased by 8.771.900 ordinary shares of €1,71 each, thus the total authorised and issued share capital of the Bank to date was €158.297.949.

On 14th October 2024 the authorised and issued share capital of the Bank was increased by 38.011.600 ordinary shares of €1,71 each, thus the total authorised and issued share capital of the Bank to date is €223.297.785.

RESULTS

The Bank's results for the year ended 31 December 2024 are set out on pages 12 and 16. The profit for the year is transferred to retained earnings.

EVENTS AFTER THE REPORTING PERIOD

There are no material events after the reporting period, which have a bearing on the understanding of financial statements.

BOARD OF DIRECTORS

The members of the Board of Directors at 31 December 2024 and at the date of this report are shown on page 1. All of them were members of the Board throughout the year 2024, except for:

- Mrs. Maria Papakokkinou who was appointed on 30 January 2024,
- Mr. Ernestos Panayiotou who was appointed on 8 May 2024,
- Mr. Marinis Stratopoulos who resigned on 29 May 2024,
- Mrs. Louka Katseli who resigned on 30 November 2024.
- Mrs. Niki Alexandrou who was appointed on 3 April 2025

Independent Auditor's Report

To the Members of National Bank of Greece (Cyprus) Limited

Report on the Audit of the Separate Financial Statements

Our opinion

In our opinion, the accompanying separate financial statements of parent company National Bank of Greece (Cyprus) Limited (the "Bank") give a true and fair view of the financial position of the Bank as at 31 December 2024, and of its financial performance and its cash flows for the year then ended in accordance with IFRS Accounting Standards as adopted by the European Union and the requirements of the Cyprus Companies Law, Cap. 113.

What we have audited

We have audited the separate financial statements which are presented in pages 12 to 93 and comprise:

- the balance sheet as at 31 December 2024;
- the income statement for the year then ended;
- the statement of comprehensive income for the year then ended;
- the statement of changes in equity for the year then ended;
- the statement of cash flows for the year then ended; and
- the notes to the separate financial statements, which include material accounting policy information.

The financial reporting framework that has been applied in the preparation of the separate financial statements is IFRS Accounting Standards as adopted by the European Union and the requirements of the Cyprus Companies Law, Cap. 113.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Separate Financial Statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Bank throughout the period of our appointment in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) together with the ethical requirements that are relevant to our audit of the separate financial statements in Cyprus, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code.

Key audit matters incorporating the most significant risks of material misstatements, including assessed risk of material misstatements due to fraud

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the separate financial statements of the current period. These matters were addressed in the context of our audit of the separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

PricewaterhouseCoopers Ltd, PwC Central, 43 Demostheni Severi Avenue, CY-1080 Nicosia P O Box 21612, CY-1591 Nicosia, Cyprus T: +357 - 22 555 000, F:+357 - 22 555 001, www.pwc.com.cy

Key Audit Matter

Credit loss allowance for loans and advances to customers, using the expected credit loss model in line with the requirements of IFRS 9 "Financial Instruments"

We focused on this area as complex models have been developed by the Bank to calculate expected credit losses ("ECL") and significant estimates are involved in estimating ECL on loans and advances to customers.

Loans and advances to customers comprise a large portion of the Bank's total assets and in view of the significance of the estimates involved in estimating ECL on loans and advances to customers we have considered this to be a key audit matter.

Note 3 "Material accounting policy information", Note 5 "Critical Accounting Estimates and Judgments", Note 21 "ECL allowance on loans and advances to customers at amortised cost" and Note 39 "Risk Management" to the separate financial statements provide detailed information on the estimation of ECL on loans and advances to customers, on credit risk management practices, credit risk exposures, as well as qualitative and quantitative information arising from ECL on loans and advances to customers.

How our audit addressed the Key Audit Matter

We updated our understanding of the models used by the Bank and further evaluated management's implementation process of these models for the calculation of ECL. These included probability-weighted macroeconomic scenarios, staging criteria and loss given default estimates.

We have focused on the following judgments and estimates which could give rise to material misstatement or are potentially subject to management bias:

- Probability of default ("PD");
- Loss given default ("LGD");
- Forward looking information.

Further, in obtaining sufficient audit evidence we:

- Obtained an understanding and assessed the reasonableness of the key outputs calculated by the models through recalculation, benchmarking and other relevant procedures;
- Understood, evaluated the design and implementation and tested the operating effectiveness of a sample of key controls around the process of loan performance monitoring and the process of ECL data input management;
- Evaluated, challenged and tested the reasonableness and appropriateness of the key assumptions and judgments adopted by management as well as their compliance with requirements of IFRS 9;
- Reviewed the Bank's methodology for ECL provisioning to establish key inputs used in the calculation engine and on a sample basis tested the key inputs used. Inputs used in the sample tested were compared to the ECL methodology to ensure consistency with policies;
- Performed procedures to obtain comfort on the accuracy of the ECL calculation process through recalculation;
- Performed procedures by reference to the criteria and triggers adopted by management to ensure that the Bank

Key Audit Matter	How our audit addressed the Key Audit Matter
	applies the three-stage approach for categorisation of loans and advances to customers and that changes in credit quality since initial recognition are appropriately monitored, determined and measured as at the statement of financial position date;
	 Performed loan file reviews on a sample basis to inspect financial particulars and assessed the adequacy of ECL;
	 We evaluated the appropriateness of the Bank's disclosures particularly in relation to critical estimates and judgments.
	The results of the above procedures were satisfactory.

Reporting on other information

The Board of Directors is responsible for the other information. The other information comprises the information included in the Management Report but does not include the separate financial statements and our auditor's report thereon.

Our opinion on the separate financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the separate financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the separate financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors and those charged with governance for the Separate Financial Statements

The Board of Directors is responsible for the preparation of the separate financial statements that give a true and fair view in accordance with IFRS Accounting Standards as adopted by the European Union and the requirements of the Cyprus Companies Law, Cap. 113, and for such internal control as the Board of Directors determines is necessary to enable the preparation of separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the separate financial statements, the Board of Directors is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Bank's financial reporting process.

Auditor's Responsibilities for the Audit of the Separate Financial Statements

Our objectives are to obtain reasonable assurance about whether the separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the separate financial statements,
 whether due to fraud or error, design and perform audit procedures responsive to those risks, and
 obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk
 of not detecting a material misstatement resulting from fraud is higher than for one resulting from
 error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the
 override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing an
 opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the separate financial statements, including the disclosures, and whether the separate financial statements represent the underlying transactions and events in a manner that achieves a true and fair view.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the separate financial statements of the current period and are therefore the key audit matters.

Report on Other Legal and Regulatory Requirements

Pursuant to the requirements of Article 10(2) of the EU Regulation 537/2014 we provide the following information in our Independent Auditor's Report, which is required in addition to the requirements of International Standards on Auditing.

Appointment of the Auditor and Period of Engagement

We were first appointed as auditors of the Bank on 5 October 2017 by the Board of Directors of the Bank for the audit of the separate financial statements for the year ended 31 December 2017. Our appointment has been renewed annually by shareholder resolution representing a total period of uninterrupted engagement appointment of 8 years.

Consistency of the Additional Report to the Audit Committee

We confirm that our audit opinion on the separate financial statements expressed in this report is consistent with the additional report to the Audit Committee of the Bank, which we issued on 30 April 2025 in accordance with Article 11 of the EU Regulation 537/2014.

Provision of Non-audit Services

We declare that no prohibited non-audit services referred to in Article 5 of the EU Regulation 537/2014 and Section 72 of the Auditors Law of 2017 were provided. In addition, there are no non-audit services which were provided by us to the Bank and which have not been disclosed in the separate financial statements or the management report.

Other Legal Requirements

Pursuant to the additional requirements of the Auditors Law of 2017, we report the following:

- In our opinion, based on the work undertaken in the course of our audit, the management report has been prepared in accordance with the requirements of the Cyprus Companies Law, Cap. 113, and the information given is consistent with the separate financial statements.
- In light of the knowledge and understanding of the Bank and its environment obtained in the course of the audit, we are required to report if we have identified material misstatements in the management report. We have nothing to report in this respect.

Other Matter

This report, including the opinion, has been prepared for and only for the Bank's members as a body in accordance with Article 10(1) of the EU Regulation 537/2014 and Section 69 of the Auditors Law of 2017 and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whose knowledge this report may come to.

The engagement partner on the audit resulting in this independent auditor's report is Alexandros Papadopoulos.

Balance at 31 December 2024	223.297.785	8.770.224	12.274.974	(18.353.468)	225.989.515

Companies which do not distribute 70% of their profits after tax, as defined by the Special Contribution for the Defence of the Republic Law, by the end of the two years after the end of the year of assessment to which the profits refer, will be deemed to have distributed this amount as dividend. Special contribution for defence at the rate of 17% will be payable on such deemed dividend to the extent that the shareholders for deemed dividend distribution purposes at the end of the period of two years from the end of the year of assessment to which the profits refer, are Cyprus tax residents and domiciled. From 1 March 2019, the deemed dividend distribution is subject to a 1,70% contribution to the National Health System, increased to 2,65% from 1 March 2020, with the exception of April 2020 until June 2020 when the 1,70% rate was applicable. The amount of this deemed dividend distribution is reduced by any actual dividend paid out of the profits of the relevant year by the end of the period of two years from the end of the year of assessment to which the profits refer. This special contribution for defence is paid by the Company for the account of the shareholders.

STATEMENT OF CASH FLOWS FOR THE YEAR ENDED 31 DECEMBER 2024

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

1. GENERAL INFORMATION

Country of incorporation

National Bank of Greece (Cyprus) Limited (the "Bank") is incorporated in Cyprus as a private limited liability company in accordance with the provisions of the Cyprus Companies Law, Cap. 113. Its parent and ultimate holding company is National Bank of Greece S.A. which is incorporated in Greece.

Principal activities

The principal activities of the Bank are the provision of a wide range of banking and financial services.

2. ADOPTION OF NEW AND REVISED INTERNATIONAL FINANCIAL REPORTING STANDARDS AND INTERPRETATIONS

During the current year the Bank adopted all the new and revised IFRS Accounting Standards as adopted by the European Union (EU) that are relevant to its operations and are effective for accounting periods beginning on 1 January 2024. This adoption did not have a material effect on the accounting policies of the Company.

3. MATERIAL ACCOUNTING POLICY INFORMATION

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

Basis of preparation

The financial statements have been prepared in accordance with IFRS Accounting Standards as adopted by the EU and the requirements of the Cyprus Companies Law, Cap. 113.

As of the date of the authorisation of the financial statements, all IFRS Accounting Standards issued by the International Accounting Standards Board (IASB) that are effective as of 1 January 2024 have been adopted by the EU through the endorsement procedure established by the European Commission.

These financial statements contain information about National Bank of Greece (Cyprus) Limited as an individual Bank and do not contain consolidated financial information as the parent of a group. The Bank has taken advantage of the exemption under IFRS 10 "Consolidated Financial Statements" and the Cyprus Companies Law, Cap.113 from the requirement to prepare consolidated financial statements as the Bank and its subsidiary are included in the consolidated financial statements of its parent bank, National Bank of Greece S.A., which prepares consolidated and separated financial statements in accordance with IFRS Accounting Standards as adopted by the EU that are available for public use. These consolidated financial statements are available at the National Bank of Greece S.A.'s website (www.nbg.gr).

The financial statements have been prepared on a going concern basis. Management has made an assessment of the Bank's ability to continue as a going concern. Despite the uncertain economic environment as described in Note 38 of the financial statements, the Board of Directors of the Bank has assessed that the Bank has the ability to continue its operations as a going concern on the basis of the Bank's liquidity and capital adequacy position.

The Bank's presentation currency is the Euro (ϵ) , which is also the Bank's functional currency.

The financial statements are prepared on a historical cost basis, except for land and buildings, financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income and derivative financial instruments that are measured at fair value at the end of each reporting period, as explained in the accounting policies below.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

3. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

Foreign currency translation

Functional and presentation currency

Items included in the Bank's financial statements are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The financial statements are presented in Euro (\mathfrak{E}) , which is the Bank's functional and presentation currency.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions.

Monetary items denominated in a foreign currency are translated using the closing rate as at the reporting date. Non-monetary items measured at historic cost denominated in a foreign currency are translated with the exchange rate as at the date of initial recognition; non-monetary items in a foreign currency that are measured at fair value are translated using the exchange rates at the date when the fair value was determined.

Translation differences on non-monetary items, such as equities held at fair value through profit or loss, are recognised in profit or loss, as part of the fair value gain or loss. Translation differences on non-monetary financial assets, such as equities classified as financial assets at fair value through other comprehensive income are included in other comprehensive income.

Revenue

Fee and commission income

Fee and commission income is recognised over time on a straight line basis as the services are rendered, when the customer simultaneously receives and consumes the benefits provided by the Bank's performance. Such income includes recurring fees for account maintenance, account servicing fees, guarantee issue fee and agency fee income whereby the Bank acts as an agent of a third party in entering and completing a transaction on pre-determined terms and conditions.

Fee and commission income is recognised at a point in time when the Bank satisfies its performance obligation, usually upon execution of the underlying transaction. The amount of fee or commission received or receivable represents the transaction price for the services identified as distinct performance obligations. Such income includes fees for processing payment transactions, fees for cash settlements and collection of cash disbursements.

Initial recognition of financial instruments

Financial instruments at FVTPL are initially recorded at fair value. All other financial instruments are initially recorded at fair value adjusted for transaction costs.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The best evidence of fair value is price in an active market. An active market is one in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. Fair value of financial instruments traded in an active market is measured as the product of the quoted price for the individual asset or liability and the quantity held by the entity. This is the case even if a market's normal daily trading volume is not sufficient to absorb the quantity held and placing orders to sell the position in a single transaction might affect the quoted price.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

3. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

Initial recognition of financial instruments (continued)

Fair value at initial recognition is best evidenced by the transaction price. A gain or loss on initial recognition is only recorded if there is a difference between fair value and transaction price which can be evidenced by other observable current market transactions in the same instrument or by a valuation technique whose inputs include only data from observable markets. After the initial recognition, an ECL allowance is recognised for financial assets measured at AC and investments in debt instruments measured at FVOCI, resulting in an immediate accounting loss.

All purchases and sales of financial assets that require delivery within the time frame established by regulation or market convention ("regular way" purchases and sales) are recorded at settlement date, which is the date on which the asset is delivered to the Bank. All other purchases are recognised when the entity becomes a party to the contractual provisions of the instrument. Any change in fair value of the assets classified as financial assets at fair value through profit or loss or at other comprehensive income to be received during the period between the trade date and the settlement date is recognised in profit or loss and in OCI, respectively. However changes in the fair value of assets carried at amortized cost between trade date and settlement date are not recognized.

Financial assets – Classification

The Bank classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through OCI or through profit or loss), and
- those to be measured at amortised cost.

The classification and subsequent measurement of debt financial assets depends on: (i) the Bank's business model for managing the related assets portfolio and (ii) the cash flow characteristics of the asset. On initial recognition, the Bank may irrevocably designate a debt financial asset that otherwise meets the requirements to be measured at amortized cost or at FVOCI at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

For investments in equity instruments that are not held for trading, classification will depend on whether the Bank has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI). This election is made on an investment-by-investment basis.

All other financial assets are classified as measured at FVTPL.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. For investments in equity instruments that are not held for trading, this will depend on whether the Bank has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI).

Financial assets - Recognition and derecognition

All purchases and sales of financial assets that require delivery within the time frame established by regulation or market convention ("regular way" purchases and sales) are recorded at trade date, which is the date when the Bank commits to deliver a financial instrument. All other purchases and sales are recognized when the entity becomes a party to the contractual provisions of the instrument.

Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Bank has transferred substantially all the risks and rewards of ownership.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

3. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

Financial assets - Measurement

At initial recognition, the Bank measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVTPL are expensed in profit or loss. Fair value at initial recognition is best evidenced by the transaction price. A gain or loss on initial recognition is only recorded if there is a difference between fair value and transaction price which can be evidenced by other observable current market transactions in the same instrument or by a valuation technique whose inputs include only data from observable markets.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

Debt instruments

Subsequent measurement of debt instruments depends on the Bank's business model for managing the asset and the cash flow characteristics of the asset. The Bank classifies all of its debt instruments at amortised cost.

Under the amortised cost measurement category, assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in interest income. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses are presented as separate line item in the income statement. Financial assets measured at amortised cost (AC) comprise: cash and cash equivalents, bank deposits with original maturity over 3 months, Loans and advances to customers, Deposits with Banks, Cash Balances with Central Bank and Financial Assets at amoritsed cost.

Equity instruments

The Bank subsequently measures all equity investments at fair value. Where the Bank's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment, any related balance within the FVOCI reserve is reclassified to retained earnings. The Bank's policy is to designate equity investments as FVOCI when those investments are held for strategic purposes other than solely to generate investment returns. Dividends from such investments continue to be recognised in profit or loss as other income when the Bank's right to receive payments is established.

Changes in the fair value of financial assets at FVTPL are recognised in "other gains/(losses)" in the income statement as applicable. Impairment losses (and reversal of impairment losses) on equity investments measured at FVOCI are not reported separately from other changes in fair value.

Financial assets – impairment – credit loss allowance for Expected Credit Loss (ECL)

The Bank assesses on a forward-looking basis the ECL for all financial assets measured at AC and for the exposure arising from loan commitments and financial guarantee contracts. The Bank measures ECL and recognises credit loss allowance at each reporting date. The measurement of ECL reflects: (i) an unbiased and probability weighted amount that is determined by evaluating a range of possible outcomes, (ii) time value of money and (iii) all reasonable and supportable information that is available without undue cost and effort at the end of each reporting period about past events, current conditions and forecasts of future conditions.

The carrying amount of the financial assets is reduced through the use of an allowance account, and the amount of the loss is recognised in the income statement within "(Impairment charges)/reversal of amount of impairment losses for ECL on other financial assets" and "Reversal of impairment losses for ECL on loans and advances to customers".

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

3. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

Financial assets - impairment - credit loss allowance for Expected Credit Loss (ECL) (continued)

Debt instruments, loans and advances to customers and other financial assets measured at AC are presented in the balance sheet net of the allowance for ECL. For loan commitments and financial guarantee contracts, a separate provision for ECL is recognised as a liability in the balance sheet.

For debt instruments at FVOCI, an allowance for ECL is recognised in profit or loss and it affects fair value gains or losses recognised in OCI rather than the carrying amount of those instruments.

For all financial assets that are subject to impairment under IFRS 9, the Bank applies the general approach – three stage model for impairment. The Bank applies a three stage model for impairment, based on changes in credit quality since initial recognition. A financial instrument that is not credit-impaired on initial recognition is classified in Stage 1. Financial assets in Stage 1 have their ECL measured at an amount equal to the portion of lifetime ECL that results from default events possible within the next 12 months or until contractual maturity, if shorter ("12 Months ECL").

If the Bank identifies a significant increase in credit risk ("SICR") since initial recognition, the asset is transferred to Stage 2 and its ECL is measured based on ECL on a lifetime basis, that is, up until contractual maturity but considering expected prepayments, if any ("Lifetime ECL"). Refer to Note 39, Credit risk section for a description of how the Bank determines when a SICR has occurred. If the Bank determines that a financial asset is credit-impaired, the asset is transferred to Stage 3 and its ECL is measured as a Lifetime ECL. The Bank's definition of credit impaired assets and definition of default is explained in Note 39, Credit risk section.

Financial assets - Reclassification

Financial instruments are reclassified only when the business model for managing those assets changes. The reclassification has a prospective effect and takes place from the start of the first reporting period following the change.

Financial assets - write-off

Financial assets are written-off, in whole or in part, when the Bank has exhausted all practical recovery efforts and has concluded that there is no reasonable expectation of recovery. The write-off represents a derecognition event. The Bank may write-off financial assets that are still subject to enforcement activity when the Bank seeks to recover amounts that are contractually due, however, there is no reasonable expectation of recovery.

Financial assets - modification

The Bank sometimes renegotiates or otherwise modifies the contractual terms of the financial assets. The Bank assesses whether the modification of contractual cash flows is substantial considering, among other, the following factors: any new contractual terms that substantially affect the risk profile of the asset (e.g. profit share or equity-based return), significant change in interest rate, change in the currency denomination, new collateral or credit enhancement that significantly affects the credit risk associated with the asset or a significant extension of a loan when the borrower is not in financial difficulties.

If the modified terms are substantially different, the rights to cash flows from the original asset expire and the Bank derecognises the original financial asset and recognises a new asset at its fair value. The date of renegotiation is considered to be the date of initial recognition for subsequent impairment calculation purposes, including determining whether a SICR has occurred. The Bank also assesses whether the new loan or debt instrument meets the SPPI criterion. Any difference between the carrying amount of the original asset derecognised and fair value of the new substantially modified asset is recognised in profit or loss, unless the substance of the difference is attributed to a capital transaction with owners.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

3. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

Financial assets – modification (continued)

In a situation where the renegotiation was driven by financial difficulties of the counterparty and inability to make the originally agreed payments, the Bank compares the original and revised expected cash flows to assess whether the risks and rewards of the asset are substantially different as a result of the contractual modification. If the risks and rewards do not change, the modified asset is not substantially different from the original asset and the modification does not result in derecognition. The Bank recalculates the gross carrying amount by discounting the modified contractual cash flows by the original effective interest rate, and recognises a modification gain or loss in profit or loss.

Cash and cash equivalents

In the statement of cash flows, cash and cash equivalents includes cash in hand, deposits held at call with banks with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Cash and cash equivalents for the purposes of the statement of cash flows, consist of balances with original maturity less than three months, including cash, unrestricted balances with central bank and amounts due from other banks.

Funds restricted for a period of more than three months on origination are excluded from cash and cash equivalents. Cash and cash equivalents are carried at amortised cost because: (i) they are held for collection of contractual cash flows and those cash flows represent SPPI, and (ii) they are not designated at FVTPL.

Interest income and expense calculated using the effective interest method

Interest income for all financial assets carried at amortised cost and all debt financial assets carried at fair value through other comprehensive income is recognised in the profit or loss using the effective interest method. Interest expense for all interest bearing financial instruments is recognised in profit or loss using the effective interest method.

The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial asset or financial liability, or a shorter period, if appropriate, to the gross carrying amount of a financial asset (i.e. excluding future credit losses) or to the amortised cost of a financial liability. The amortised cost is the amount at which the financial asset or financial liability is measured at initial recognition minus the principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between the initial amount and the maturity amount and, for financial assets, adjusted for any loss allowance.

The effective interest rate discounts cash flows of variable interest instruments to the next interest repricing date, except for the premium or discount, which reflects the credit spread over the floating rate specified in the instrument, or other variables that are not reset to market rates. Such premiums or discounts are amortised over the whole expected life of the instrument.

The effective interest calculation does not consider expected credit losses and includes transaction costs, premiums or discounts and fees and points paid or received that are integral to the effective interest rate, such as origination fees.

For purchased or originated credit-impaired ("POCI") financial assets – assets that are credit impaired at initial recognition, the Bank calculates the credit-adjusted effective interest rate, which is calculated based on the amortised cost of the financial asset instead of its gross carrying amount and incorporates the impact of expected credit losses in estimated future cash flows.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

3. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

Interest income and expense calculated using the effective interest method (continued)

Interest income is calculated by applying the effective interest rate to the gross carrying amount of financial assets, except for:

- (a) POCI financial assets, for which the original credit-adjusted effective interest rate is applied to the amortised cost of the financial assets; and
- (b) Financial assets that are not "POCI" but have subsequently become credit-impaired (or "stage 3"), for which interest income is calculated using the effective interest rate to their amortised cost (i.e. net of the expected credit loss provision).

When applying the effective interest method, the Bank amortises any fees, paid or received, transaction costs and other premiums or discounts that are included in the calculation of the effective interest rate over the expected life of the financial instrument. However, a shorter period is used if this is the period to which the fees, points paid or received, transaction costs, premiums or discounts relate. This will be the case when the variable to which the fees, points paid or received, transaction costs, premiums or discounts relate is repriced to market rates before the expected maturity of the financial instrument. In such a case, the appropriate amortisation period is the period to the next such repricing date.

Transaction costs include fees and commission paid to agents, advisers, brokers and dealers, levies by regulatory agencies and security exchanges, and transfer taxes and duties. Transaction costs do not include debt premiums or discounts, financing costs or internal administrative or holding costs.

Commitment fees received by the Bank to originate loans at market interest rates are integral to the effective interest rate if it is probable that the Bank will enter into a specific lending arrangement and does not expect to sell the resulting loan shortly after origination. The Bank does not designate loan commitments as financial liabilities at FVTPL.

Dividend income

Dividends are received from financial assets measured at fair value through profit or loss (FVTPL) and at fair value through other comprehensive income (FVOCI). Dividends are recognised as other income in profit or loss when the right to receive payment is established. This applies even if they are paid out of preacquisition profits, unless the dividend clearly represents a recovery of part of the cost of an investment. In this case, the dividend is recognised in OCI if it relates to an investment measured at FVOCI.

Financial guarantee contracts

Financial guarantee contracts are contracts that require the Bank to make specified payments to reimburse the holder of the guarantee for a loss it incurs because a specified debtor fails to make payment when due in accordance with the terms of debt instrument. Such financial guarantees are given to banks, financial institutions and others on behalf of customers to secure loans, overdrafts and other banking facilities.

Financial guarantees are recognised as a financial liability at the time the guarantee is issued. Financial guarantees are initially recognised at their fair value, which is normally evidenced by the amount of fees received. This amount is amortised on a straight line basis over the life of the guarantee in other income in profit or loss.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Vear ended 31 December 2024

3. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

Financial guarantee contracts (continued)

At the end of each reporting period, the guarantee is subsequently at the higher of:

- the amount of the loss allowance determined in accordance with the expected credit loss model under IFRS 9 *Financial Instruments*; and
- the amount initially recognised less, where appropriate, the cumulative amount of income recognised in accordance with the principles of IFRS 15 Revenue from Contracts with Customers.

The fair value of financial guarantees is determined based on the present value of the difference in cash flows between the contractual payments required under the debt instrument and the payments that would be required without the guarantee, or the estimated amount that would be payable to a third party for assuming the obligations.

Credit related commitments

The Bank issues commitments to provide loans. Commitments to provide loans are initially recognised at their fair value, which is normally evidenced by the amount of fees received. Such loan commitment fees are deferred and included in the carrying amount of the loan on initial recognition. Loan commitments provided by the Bank are measured as the amount of the loss allowance calculated under IFRS 9.

At the end of each reporting period, the commitments are measured at

- (i) the remaining unamortised balance of the amount at initial recognition, plus
- (ii) the amount of the loss allowance determined based on the expected credit loss model.

For loan commitments (where those components can be separated from the loan), a separate provision for ECL is recognised as a liability in the statement of financial position. However, for contracts that include both a loan and an undrawn commitment and the Bank cannot separately identify the expected credit losses on the undrawn commitment component from those on the loan component, the expected credit losses on the undrawn commitment are recognised together with the loss allowance for the loan. To the extent that the combined expected credit losses exceed the gross carrying amount of the loan, the expected credit losses are recognised as a provision.

Financial liabilities - measurement categories

Financial liabilities are initially recognised at fair value and subsequently measured at amortised cost, except for (i) financial liabilities at FVTPL: this classification is applied to derivatives, financial liabilities held for trading (e.g. short positions in securities), contingent consideration recognised by an acquirer in a business combination and other financial liabilities designated as such at initial recognition and (ii) financial guarantee contracts and loan commitments.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

3. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

Property, plant and equipment

Land and buildings are shown at fair value, based on valuations by external independent valuers, less subsequent depreciation for buildings. Revaluations are performed with sufficient regularity such that the carrying amounts do not differ materially from those that would be determined using fair values at the balance sheet date. Any accumulated depreciation at the date of the revaluation is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset.

Increases in the carrying amount arising on revaluation of land and buildings are credited in other comprehensive income and shown as revaluation reserve in shareholders' equity. Decreases that offset previous increases of the same asset are charged in other comprehensive income and debited against revaluation reserve directly in equity; all other decreases are charged to profit or loss.

The property revaluation reserve includes revaluation of property initially used by the Bank for its operations and subsequently transferred to investment properties.

On the subsequent sale or retirement of a revalued property, the attributable revaluation surplus remaining in the properties revaluation reserve is transferred directly to retained earnings. No transfer is made from the revaluation reserve to retained earnings except when an asset is derecognised.

Furniture and equipment and motor vehicles are stated at historical cost less accumulated depreciation and any accumulated impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of property, plant and equipment.

The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

Depreciation is charged so as to write off the cost or valuation of assets, other than land over their estimated useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis.

The annual depreciation rates used are as follows:

Buildings and installations 3% to 20% Furniture and equipment 10% to 20% Motor vehicles 20%

No depreciation is charged on land.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Expenditure for repairs and maintenance of property, plant and equipment is charged to the income statement of the year in which they were incurred. The cost of major renovations and other subsequent expenditure are included in the carrying amount of the asset or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Bank and the cost of the item can be measured reliably.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

3. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

Stock of property

The Bank in its normal course of business acquires properties in exchange of debt for the sole purpose of managing these properties with an intention to be disposed of. These properties are recognised in the financial statements as 'Stock of property', reflecting the substance of these transactions. Stock of property is initially measured at cost and subsequently measured at the lower of cost and net realisable value. Net realisable value is the estimated selling price, less the estimated costs necessary to make the sale. If net realisable value is below the cost of the stock of property, impairment is recognised in the income statement.

Computer software

Costs that are directly associated with identifiable and unique computer software products controlled by the Bank and that will probably generate economic benefits exceeding costs beyond one year are recognised as intangible assets. Subsequently computer software is carried at cost less any accumulated amortization and any accumulated impairment losses.

Expenditure which enhances or extends the performance of computer software programme beyond their original specifications is recognised as a capital improvement and added to the original cost of the computer software. Costs associated with maintenance of computer software programme are charged to the income statement of the year in which they were incurred.

Computer software costs are amortised using the straight-line method over their estimated useful lives, not exceeding a period of three years. Amortisation commences when the computer software is available for use.

Intangible assets are reviewed for impairment when events relating to charges to circumstances indicate that the carrying amount may not be recoverable. If the carrying amount exceeds the recoverable amount, then the intangible assets are written down to their recoverable amount.

Useful economic lives and amortisation method are reviewed at the end of each reporting period with the effect of any changes in estimate being accounted for on a prospective basis.

Impairment of non financial assets

Assets that are subject to depreciation or amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash generating units). Non-financial assets that have suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

3. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

Employee benefits

The Bank and the employees contribute to a defined contributions scheme.

Under the defined contributions scheme the Bank and members of staff pay fixed contributions into a separate provident fund. The Bank's contributions are recognised in the period they relate to and included in staff costs in the income statement. The Bank has no further payment obligations once the contributions have been paid.

Termination benefits

Termination benefits are payable when employment is terminated by the Bank before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Bank recognises termination benefits at the earlier of the following dates: (a) when the Bank can no longer withdraw the offer of those benefits; and (b) when the entity recognizes costs for a restructuring that is within the scope of IAS 37 and involves the payment of termination benefits. In the case of an offer made to encourage voluntary redundancy, the termination benefits are measured based on the number of employees expected to accept the offer. Benefits falling due more than 12 months after the end of the reporting period are discounted to their present value.

Current and deferred income tax

Current income tax

Income tax payable/(receivable) is calculated on the basis of the applicable tax law in the respective jurisdiction and is recognised as an expense/(income) for the period except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case, the tax is also recognised in other comprehensive income or directly in equity, respectively.

The current income tax is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the country in which the Bank operates and generates taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation.

If applicable tax regulation is subject to interpretation, it establishes provision where appropriate on the basis of amounts expected to be paid to the tax authorities.

Where tax losses can be relieved only by carry-forward against taxable profits of future periods a deductible temporary difference arises. Those losses carried forward are set off against deferred tax liabilities carried in the balance sheet.

The Bank does not offset current income tax liabilities and current income tax assets.

Deferred income tax

Deferred income tax is recognised using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using tax rates and laws that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

3. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

Current and deferred income tax (continued)

Deferred income tax (continued)

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

The tax effects of carry-forward of unused losses or unused tax credits are recognised as an asset when it is probable that future taxable profits will be available against which these losses can be utilised.

Deferred tax related to items recognised in other comprehensive income, is also recognised in other comprehensive income.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on the Bank where there is an intention to settle the balances on a net basis.

Special levy

According to the "Special Levy on Credit Institutions Law of 2011 to 2015", special levy is imposed on credit institutions on a quarterly basis, at the rate of 0,0375% on 31st December, 31st March, 30th June and 30th September on qualifying deposits held by each credit institution. The special levy is included in other operating expenses, Note 14.

Provisions

Provisions are recognized when the Bank has: (a) a present obligation (legal or constructive) arising from past events, (b) it is probable that the obligation will result in an outflow of resources embodying economic benefits and (c) a reliable estimate of the amount of the obligation can be made.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

Restructuring provisions comprise lease termination penalties and employee termination payments, and are recognised in the period in which the Bank becomes legally or constructively committed to payment. Costs related to the ongoing activities of the Bank are not provided in advance. Provisions are not recognised for future operating losses.

Share capital

Ordinary shares are classified as equity.

Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

Other liabilities

Other liabilities are recognised initially at fair value and are subsequently measured at amortised cost using the effective interest rate method.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

3. MATERIAL ACCOUNTING POLICY INFORMATION (continued)

Deposits from banks and deposits from customers

Deposits from banks and deposits from customers are recognised initially at fair value, net of transaction costs incurred and are subsequently measured at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption value is recognised in interest expense in the income statement using the effective interest rate method. Deposits from banks and deposits from customers are derecognised when they are extinguished, that is, when the obligation in discharged.

Related party transactions

Related parties include the parent and ultimate controlling party, fellow subsidiaries, other group companies under common control, directors and key management personnel, their close families, companies owned or controlled by them and companies whose financial and operating policies they can influence. Transactions of similar nature within the same category are disclosed on an aggregated basis.

Comparatives

Except when a standard or an interpretation permits or requires otherwise, all amounts are reported or disclosed with comparative information.

4. NEW ACCOUNTING PRONOUNCEMENTS

At the date of approval of these financial statements a number of new standards, interpretations and amendments to existing standards are effective for annual periods beginning after 1 January 2024 and have not been applied in preparing these financial statements.

- Amendments to IAS 21 Lack of Exchangeability (issued on 15 August 2023 and effective for annual periods beginning on or after 1 January 2025). In August 2023, the IASB issued amendments to IAS 21 to help entities assess exchangeability between two currencies and determine the spot exchange rate, when exchangeability is lacking. An entity is impacted by the amendments when it has a transaction or an operation in a foreign currency that is not exchangeable into another currency at a measurement date for a specified purpose. The amendments to IAS 21 do not provide detailed requirements on how to estimate the spot exchange rate. Instead, they set out a framework under which an entity can determine the spot exchange rate at the measurement date. When applying the new requirements, it is not permitted to restate comparative information. It is required to translate the affected amounts at estimated spot exchange rates at the date of initial application, with an adjustment to retained earnings or to the reserve for cumulative translation differences. The Bank is currently assessing the impact of the amendments on its financial statements and as of the date of issue of these financial statements the impact of the amendments is not known.
- Amendments to the Classification and Measurement of Financial Instruments Amendments to IFRS 9 and IFRS 7 (issued on 30 May 2024 and effective for annual periods beginning on or after 1 January 2026). On 30 May 2024, the IASB issued targeted amendments to IFRS 9 and IFRS 7 to respond to recent questions arising in practice, and to include new requirements not only for financial institutions but also for corporate entities. These amendments:
 - o clarify the date of recognition and derecognition of some financial assets and liabilities, with a new exception for some financial liabilities settled through an electronic cash transfer system;
 - clarify and add further guidance for assessing whether a financial asset meets the solely payments of principal and interest (SPPI) criterion;
 - o add new disclosures for certain instruments with contractual terms that can change cash flows (such as some financial instruments with features linked to the achievement of environment, social and governance targets); and
 - o update the disclosures for equity instruments designated at FVOCI.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

4. NEW ACCOUNTING PRONOUNCEMENTS (continued)

The Bank is currently assessing the impact of the amendments on its financial statements and as of the date of issue of these financial statements the impact of the amendments is not known.

- IFRS 18 Presentation and Disclosure in Financial Statements (issued on 9 April 2024 and effective for annual periods beginning on or after 1 January 2027). IFRS 18 will replace IAS 1 Presentation of financial statements, introducing new requirements that will help to achieve comparability of the financial performance of similar entities and provide more relevant information and transparency to users. Even though IFRS 18 will not impact the recognition or measurement of items in the financial statements, its impacts on presentation and disclosure are expected to be pervasive, in particular those related to the statement of financial performance and providing management-defined performance measures within the financial statements. The Bank is currently assessing the impact of the amendments on its financial statements and as of the date of issue of these financial statements the impact of the amendments is not known.
- IFRS 19 Subsidiaries without Public Accountability: Disclosures (Issued on 9 May 2024 and effective for annual periods beginning on or after 1 January 2027). The International Accounting Standard Board (IASB) has issued a new IFRS Accounting Standard for subsidiaries. IFRS 19 permits eligible subsidiaries to use IFRS Accounting Standards with reduced disclosures. Applying IFRS 19 will reduce the costs of preparing subsidiaries' financial statements while maintaining the usefulness of the information for users of their financial statements. Subsidiaries using IFRS Accounting Standards for their own financial statements provide disclosures that maybe disproportionate to the information needs of their users. IFRS 19 will resolve these challenges by: (a) enabling subsidiaries to keep only one set of accounting records to meet the needs of both their parent company and the users of their financial statements and (b) reducing disclosure requirements IFRS 19 permits reduced disclosure better suited to the needs of the users of their financial statements. The Bank is currently assessing the impact of the amendments on its financial statements and as of the date of issue of these financial statements the impact of the amendments is not known.
- Annual Improvements to IFRS Accounting Standards (Issued in July 2024 and effective from 1 January 2026). IFRS 1 was clarified that a hedge should be discontinued upon transition to IFRS Accounting Standards if it does not meet the 'qualifying criteria', rather than 'conditions' for hedge accounting, in order to resolve a potential confusion arising from an inconsistency between the wording in IFRS 1 and the requirements for hedge accounting in IFRS 9. IFRS 7 requires disclosures about a gain or loss on derecognition relating to financial assets in which the entity has a continuing involvement, including whether fair value measurements included 'significant unobservable inputs'. This new phrase replaced reference to 'significant inputs that were not based on observable market data'. The amendment makes the wording consistent with IFRS 13. In addition, certain IFRS 7 implementation guidance examples were clarified and text added that the examples do not necessarily illustrate all the requirements in the referenced paragraphs of IFRS 7. IFRS 16 was amended to clarify that when a lessee has determined that a lease liability has been extinguished in accordance with IFRS 9, the lessee is required to apply IFRS 9 guidance to recognise any resulting gain or loss in profit or loss. This clarification applies to lease liabilities that are extinguished on or after the beginning of the annual reporting period in which the entity first applies that amendment. In order to resolve an inconsistency between IFRS 9 and IFRS 15, trade receivables are now required to be initially recognised at 'the amount determined by applying IFRS 15' instead of at 'their transaction price (as defined in IFRS 15)'. IFRS 10 was amended to use less conclusive language when an entity is a 'de-facto agent' and to clarify that the relationship described in paragraph B74 of IFRS 10 is just one example of a circumstance in which judgement is required to determine whether a party is acting as a de-facto agent. IAS 7 was corrected to delete references to 'cost method' that was removed from IFRS Accounting Standards in May 2008 when the IASB issued amendment 'Cost of an Investment in a Subsidiary, Jointly Controlled Entity or Associate'. The Bank is currently assessing the impact of the amendments on its financial statements and as of the date of issue of these financial statements the impact of the amendments is not known.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

In the preparation of the financial statements the management of the Bank is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates and may cause a material adjustment to the carrying amounts of assets and liabilities.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The Bank makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgments are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Management also makes certain judgments, apart from those involving estimations, in the process of applying the accounting policies. Judgments that have the most significant effect on the amounts recognised in the financial statements and estimates that can cause a significant adjustment to the carrying amount of assets and liabilities within the next financial year include:

Expected credit loss measurement (ECL)

Measurement of ECLs is a significant estimate that involves determination of methodology, models and data inputs. Details of ECL measurement methodology are disclosed in Note 39. The following components have a major impact under each segment on credit loss allowance: definition of default, significant increase in credit risk ("SICR"), probability of default ("PD"), and loss given default ("LGD"), as well as models of macro-economic scenarios. The Bank regularly reviews and validates the models and inputs to the models to reduce any differences between expected credit loss estimates and actual credit loss experience.

In assessing the PD, the Bank considers a two dimensional approach in order to perform the relevant bucketing: the contract's status and the observed days past due ("dpd"). The performed bucketing is clustered under 3 main categories, the Stage 1 ("S1") PD (under P and max dpd <30d) which corresponds to the 12mpd, the Stage 2 ("S2") PD (under P and max dpd<90dpd) which corresponds to the LT-pd and the Stage 3 ("S3") PD (under S or/and >90dpd) which corresponds to a value of 100%.

The abovementioned segmentation and the pre-assignment of the PD clustering to the S1-S3 staging is not a predefined assignment since the final PD used for ECL extraction is also driven by the SICR criteria on a case by case contract and pool level.

For the S1 contracts, and as at 31 December 2024 ($\[mathcare{e}\]$ 919,7 million & $\[mathcare{e}\]$ 494,5 million for on balance and off balance sheet exposures respectively excluding exposures to financial institutions and sovereign) the increase of the 12m-pd by 0,4% and 1,20% (PD buckets 1 & 2), results to additional expected credit losses of $\[mathcare{e}\]$ 6649.668 on the S1 portfolio as per the table below:

PD Bucket_S1	12-m PD Increase	ECL Impact_S1 portfolio
P/0 dpd	0,40%	6640.669
P/ 1-30 dpd	1,20%	€649.668

For the S1 contracts, the decrease of the 12-m PD by 0,2% and 0,40% (PD buckets 1 & 2) results to decreased expected credit losses of €323.641 on the S1 portfolio as per the table below:

PD Bucket_S1	12-m PD Decrease	ECL Impact_S1 portfolio	
P/0 dpd	-0,20%	(6222 (41)	
P/ 1-30 dpd	-0,40%	(€323.641)	

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (continued)

Expected credit loss measurement (ECL) (continued)

In assessing LGDs for secured exposures, the Bank considers the range of relevant risk drivers, including: collateral type, geography (location of the collateral) and seniority of the lending exposure. Management exercises its judgment, in determining the relevant valuation collateral haircuts as well as the respective time to liquidation (FLI components are introduced in approximating the relevant values for real estate collaterals) used to determine the collateral values for LGD calculation and applied to consider liquidity and quality of pledged assets. When the collateral values exceed the individual credit exposures, the minimum LGD floor (LTV bucket \leq 60%) is applied for the measurement of ECL.

For unsecured exposures, the LGD parameter is approximated as 1 - Recovery Rate which is quantified via the Cure Rate factor, as calculated per product for Retail Exposures and as per Industry Sector for Corporate Exposures.

In its collective assessment model, the Bank uses loan to value (LTV) buckets (\leq 60%, (60% - 80%], (80% - 100%], (100% - 150%], >150%) in order to assign an LGD for each bucket. As at 31 December 2024, if all loans were downgraded by 1 LTV bucket, this would have resulted in additional expected credit losses on loans and advances to customers of \in 1,4 million (2023: \in 0,9 million).

Macroeconomic Scenarios used in ECL measurement (continued)

The Bank determines the ECL, which is a probability-weighted amount by evaluating a range of possible outcomes. Management uses forward-looking scenarios and assesses the suitability of weights used. These are based on management's assumptions taking into consideration macroeconomic, market and other related factors. Changes in these assumptions and in the external factors could significantly impact ECL. Macroeconomic inputs and weights per scenario are based on external market data.

Qualitative adjustments or overlays are occasionally made when calculated inputs do not capture all the characteristics of the market. These are reviewed and adjusted if considered necessary by the Bank's Management. In December 2023, the Risk Committee, approved the adjusted/increased LGD values for IBNR contracts (i.e contracts individually assessed with zero individual provision) as these have been proposed and calculated by the Bank's division. The proposed increase in ECL amounts regarding the contracts which have been individually assessed and no ECL amount has been recognized, was based on the increased uncertainty in the economy, following the COVID pandemic, the war in Ukraine and the significant variation in interest rates. These unexpected market conditions (fluctuations) cannot be fully and timely captured by the methodologies in place used by Financial Institutions. This adjustment is captured under the approved Management Overlays Procedure Manual.

Economic and credit conditions within geographical areas are influenced by many factors with a high degree of interdependency so that there is no one single factor to which the Bank's ECL as a whole is particularly sensitive. The Bank uses three different economic scenarios.

Moreover, in 2024, the Bank has proceeded with the recalculation of the credit risk parameters used in the calculation of the ECL amount so that the calculated ECL accurately reflects the Bank's historical performance/information as well as to capture the current macroeconomic conditions of Cyprus economy. On this purpose, validation metrics and stationarity tests have also been performed to examine the validity of the existing macro-models used for approximating the LT-PDs. Based on the results of the tests performed, the Bank proceeded with the updating of its 2nd generation macro models. The updated models for retail and corporate portfolios, contrary to the previous models, incorporate as independent/explanatory macro variables the Gross Domestic Product (GDP), Unemployment (UN) and Harmonized Index of Consumer Prices (HICP), variables commonly used by systemic banks in similar macro-model analysis. Moreover, a high degree of correlation on the abovementioned macro variables has been observed.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

Macroeconomic Scenarios used in ECL measurement (continued)

The most significant year-end assumptions relating to macroeconomic scenarios used for the ECL estimate for the year 2024 under the three economic scenarios used by the Bank are set out below. The scenarios "base", "optimistic" and "adverse" were used for all portfolios.

		2024	2025	2026	2027
A. Retail					
			%		
GDP Nominal (y-o-y)	Base	5,9	5,3	5,1	4,8
	Optimistic	6,7	9,1	7,6	6,7
	Adverse	4,6	-2,9	0,4	1,7
			%		
HICP (eop, y-o-y)	Base	3,2	1,8	1,8	1,8
	Optimistic	3,5	3,3	3,0	2,6
	Adverse	2,7	-0,6	-0,1	0,5
			%		
Unemployment	Base	5,10	4,90	4,80	4,80
	Optimistic	5,00	4,30	4,00	3,90
	Adverse	5,20	6,20	6,60	6,60
B. Corporate					
			%		
GDP Nominal (y-o-y)	Base	5,9	5,3	5,1	4,8
	Optimistic	6,7	9,1	7,6	6,7
	Adverse	4,6	-2,9	0,4	1,7
			%		
Unemployment	Base	5,10	4,90	4,80	4,80
- •	Optimistic	5,00	4,30	4,00	3,90
	Adverse	5,20	6,20	6,60	6,60

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (continued)

Macroeconomic Scenarios used in ECL measurement (continued)

The most significant year-end assumptions relating to macroeconomic scenarios used for the ECL estimate for the year 2023 are set out below. The scenarios "base", "optimistic" and "adverse" were used for all portfolios.

		2023	2024	2025	2026
A. Retail					
			%		
GDP Nominal (y-o-y)	Base	5,2	5,5	5,1	4,8
	Optimistic	6,6	5,7	6,1	5,6
	Adverse	2,7	4,3	3,7	3,8
			%		
HICP (eop, y-o-y)	Base	2,3	2,0	1,9	1,8
	Optimistic	1,4	1,7	2,4	2,2
	Adverse	3,7	2,5	1,3	1,4
			%		
Unemployment	Base	6,0	5,7	5,5	5,3
onemptoyment	Optimistic	5,6	5,2	5,0	4,9
	Adverse	6,9	6,7	6,4	6,1
B. Corporate					
b. Corporate			%		
GDP Nominal (y-o-y)	Base	5,2	5,5	5,1	4,8
	Optimistic	6,6	5,7	6,1	5,6
	Adverse	2,7	4,3	3,7	3,8
			%		
Unemployment	Base	6,0	5,7	5,5	5,3
c nemproymens	Optimistic	5,6	5,2	5,0	4,9
	Adverse	6,9	6,7	6,4	6,1

The weightings assigned to each economic scenario as at 31 December 2024 were as follows:

	Base	Optimistic	Adverse
Loans and Advances to Customers	60%	15%	25%

As at 31 December 2024, if the scenarios weights were changed as per the table below, this would have resulted in additional expected credit losses on the loans and advances to customers of $\epsilon 0,17$ million.

Base	Optimistic	Adverse
60%	10%	30%

As at 31 December 2024, if the scenarios weights were changed as per the below table below, this would have resulted in additional expected credit losses on the loans and advances to customers of €0,22 million.

Base	Optimistic	Adverse
55%	5%	40%

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (continued)

Macroeconomic Scenarios used in ECL measurement (continued)

As at 31 December 2024, if the scenarios weights were changed as per the below table below, this would have resulted in additional expected credit losses on the loans and advances to customers of €0,24 million.

Base	Optimistic	Adverse
50%	5%	45%

The weightings assigned to each economic scenarios as at 31 December 2023 were as follows:

	Base	Optimistic	Adverse
Loans and Advances to Customers	60%	15%	25%

As at 31 December 2023, if the scenarios weights were changed as per the table below, this would have resulted in additional expected credit losses on the loans and advances to customers of €0,02 million.

Base	Optimistic	Adverse
60%	10%	30%

As at 31 December 2023, if the scenarios weights were changed as per the below table below, this would have resulted in additional expected credit losses on the loans and advances to customers of €0,04 million.

Base	Optimistic	Adverse
55%	5%	40%

As at 31 December 2023, if the scenarios weights were changed as per the below table below, this would have resulted in additional expected credit losses on the loans and advances to customers of €0,05 million.

Base	Optimistic	Adverse
50%	5%	45%

As at 31 December 2024, if unemployment is increased by +3%, then GDP Nominal and Harmonised Index of Consumer Prices (HICP) will change by -27,80% and -19,10% respectively. As per the below tabulated scenarios, this would have resulted to additional expected credit losses of €0,036 million on the total portfolio as per the table below:

		ECL Impact_Total portfolio
Unemployment	+3,00%	
GDP_Nominal	-27,80%	€36.031
HICP	-19,10%	

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (continued)

Macroeconomic Scenarios used in ECL measurement (continued)

As at 31 December 2024, if unemployment is increased by +4%, then GDP Nominal and Harmonised Index of Consumer Prices (HICP) will change by -35,50% and -21,90% respectively. As per the below tabulated scenarios, this would have resulted to additional expected credit losses of €0,043 million on the total portfolio as per the table below:

		ECL Impact_Total portfolio
Unemployment	+4,00%	
GDP_Nominal	-35,50%	€43.138
HICP	-21,90%	

As at 31 December 2024, if unemployment is increased by +5%, then GDP Nominal and Harmonised Index of Consumer Prices (HICP) will change by -43,30% and -23,10% respectively. As per the below tabulated scenarios, this would have resulted to additional expected credit losses of €0,051 million on the total portfolio as per the table below:

		ECL Impact_Total portfolio
Unemployment	5,00%	
GDP_Nominal	Nominal -43,30%	€50.895
HICP	-23,10%	

As at 31 December 2023, if unemployment is increased by +3%, then GDP Nominal and Harmonised Index of Consumer Prices (HICP) will change by -23,60% and -18,60% respectively. As per the below tabulated scenarios, this would have resulted to additional expected credit losses of €0,147 million on the total portfolio as per the table below:

		ECL Impact_Total portfolio
Unemployment	3,00%	
GDP_Nominal	-23,60%	€146.932
HICP	-18,60%	

As at 31 December 2023, if unemployment is increased by +4%, then GDP Nominal and Harmonised Index of Consumer Prices (HICP) will change by -27,70% and -21,70% respectively. As per the below tabulated scenarios, this would have resulted to additional expected credit losses of €0,181 million on the total portfolio as per the table below:

		ECL Impact_Total portfolio
Unemployment	4,00%	
GDP_Nominal	-27,70%	€181.328
HICP	-21,70%	

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (continued)

Macroeconomic Scenarios used in ECL measurement (continued)

As at 31 December 2023, if unemployment is increased by +5%, then GDP Nominal and Harmonised Index of Consumer Prices (HICP) will change by -32,00% and -23,50% respectively. As per the below tabulated scenarios, this would have resulted to additional expected credit losses of €0,220 million on the total portfolio as per the table below:

		ECL Impact_Total portfolio
Unemployment	5,00%	
GDP_Nominal	-32,00%	€219.528
HICP	-23,50%	

Significant increase in credit risk ("SICR")

IFRS 9 does not include a definition of significant increase in credit risk. The Bank assesses whether significant increase in credit risk has occurred since initial recognition using predominantly quantitative and in certain cases qualitative information. Regarding the relative criteria the determination of the relevant thresholds to determine whether a significant increase in credit risk has occurred, involves management judgment. The Bank has also in place absolute criteria for SICR measurement which are triggered based on predetermined cut off values / backstop criteria (quantitative & qualitative).

In order to determine whether there has been a significant increase in credit risk, the Bank compares the risk of a default occurring over the life of a financial instrument at the end of the reporting date with the risk of default at the date of initial recognition. The assessment considers relative increase in credit risk rather than achieving a specific level of credit risk at the end of the reporting period. The Bank considers all reasonable and supportable forward-looking information available without undue cost and effort, which includes a range of non-financial factors used for the determination of the internal credit risk of the borrower.

The SICR criteria, are evaluated/validated on an annual basis as indicated on the Bank's policy.

Expected lifetime of revolving facilities

Judgment is exercised on the measurement period of expected lifetime for revolving facilities. The Bank exercises judgment in determining the period over which ECL should be computed, on the basis of historical experience with respect to the typical average life of such facilities.

Business model assessment

The business model drives classification of financial assets. Management applies judgment in determining the level of aggregation and portfolios of financial instruments when performing the business model assessment.

When assessing sales transactions, the Bank considers their historical frequency, timing and value, reasons for the sales and expectations about future sales activity. Sales transactions aimed at minimizing potential losses due to credit deterioration are considered consistent with the "hold to collect" business model. Other sales before maturity, not related to credit risk management activities, are also consistent with the "hold to collect" business model, provided that they are infrequent or insignificant in value, both individually and in aggregate. The Bank assesses significance of sales transactions by comparing the value of the sales to the value of the portfolio subject to the business model assessment over the average life of the portfolio. In addition, sales of financial assets expected only in a stress case scenario, or in response to an isolated event that is beyond the Bank's control, is not recurring and could not have been anticipated by the Bank, are regarded as incidental to the business model objective and do not impact the classification of the respective financial assets.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (continued)

Stock of property – estimation of net realizable value

Stock of property comprises real estate assets held with an intention to be disposed of. This principally relates to properties acquired through debt-for-property swaps.

Stock of property is measured at the lower of cost and net realisable value. The net realisable value is determined through valuation techniques, requiring significant judgment, taking into account all available reference points, such as expert valuation reports, current market conditions, the holding period of the asset, applying an appropriate illiquidity discount where considered necessary, and any other relevant parameters Selling expenses are deducted from the realisable value. Depending on the value of the underlying asset and available market information, the determination of costs to sell may require professional judgment which involves a high degree of uncertainty due to the relatively low level of market activity.

More information on the stock of property is disclosed in Note 26.

Related party transactions

The Company enters into transactions with its related parties in the normal course of business. These transactions are priced predominantly at market rates. Judgment is applied in determining whether transactions are priced at market rates and are recognized at initial recognition at their fair value. Judgements are made by comparing prices with relevant benchmarks.

Income taxes

Significant judgment is required in determining the provision for income taxes. There are transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Bank recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax provisions in the period in which such determination is made.

Deferred tax assets are recognised by the Bank in respect of tax losses to the extent that is probable that future taxable profits will be available against which the losses can be utilized. Judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of future taxable profits, together with future tax-planning strategies. These variables have been established on the basis of significant management judgment and are subject to uncertainty. It is possible that the actual future events could be different from the assumptions made, resulting in material adjustment to the carrying amount of deferred tax assets.

The assumptions with greater influence on deferred tax are disclosed in Note 15.

Fair value of properties held for own use

The properties held by the Bank for own use are measured at fair value less accumulated depreciation and impairment losses. Fair value is determined from valuations undertaken by professionally qualified valuers based on market signals for their existing use and is carried out at regular intervals so that the carrying amount does not differ materially from fair value.

In arriving at their estimates of the fair values of properties, the valuers use their market knowledge and professional judgment and do not rely solely on historical transactional comparable, taking into consideration that there is a greater degree of uncertainty than that which exists in a more active market.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

5. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS (continued)

Fair value of properties held for own use (continued)

Depending on the nature of the underlying asset and available market information, the determination of the fair value of property may require the use of estimates such as future cash flows from assets and discount rates applicable to those assets. All these estimates are based on local market conditions existing at the reporting date.

If the estimated value per square meter used in the calculations for the properties held for own use was reduced by 15% the value of the properties would be \in 1,5m (2023: \in 1,5m) lower, with an equivalent impact on the revaluation reserve.

More information on inputs used is disclosed in Note 24.

6. INTEREST INCOME

	2024	2023
	€	€
Loans and advances to customers at amortised cost	38.789.016	14.023.691
Deposits with banks and Central Bank at amortised cost	7.640.595	2.113.244
Other financial assets at amortised cost (Note 23)	921.816	1.005.534
Deposits with customers at amortised cost	-	2.036
	47.351.427	17.144.505

Interest income from loans and advances to customers includes interest on the net carrying amount of impaired loans and advances to customers amounting to €437.194 (2023: €996.465).

7. INTEREST EXPENSE

		2024	2023
		€	€
	Deposits and other customer accounts at amotised cost	6.600.303	591.188
	Deposits from banks at amortised cost	13.626.354	1.964.577

	6.004.509	4.747.434

According to the "Special Levy on Credit Institutions Law of 2011 to 2015", special levy is imposed on credit institutions on a quarterly basis, at the rate of 0,0375% on 31st December, 31st March, 30th June and 30th September on qualifying deposits held by each credit institution.

The total fees charged by PwC Cyprus for audit services provided on the annual statutory financial statements for the year ended 31 December 2024 amounted to €85.000 (2023: €50.000). No audit services were provided by other PwC network firm.

PwC Cyprus and other PwC network firms have not provided any other assurance services, tax advisory services or non assurance related services.

15. INCOME TAX

(a) Tax recognised in profit or loss:

	2024 €	2023 €
Deferred tax charge/(credit) Withholding tax	728.939 192.731	(316.692)
Total income tax charge/(credit)	921.670	(316.692)

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

15. INCOME TAX (continued)

The tax on the Bank's profit before the tax differs from the theoretical amount that would arise using the applicable tax rate as follows:

	2024 €	2023 €
Profit before tax	14.563.694	5.288.336
Tax calculated at the applicable corporation tax rate of 12,5% Tax effect of expenses not deductible for tax purposes Tax effect of allowances and income not subject to tax Notional interest deduction	1.820.462 352.727 (143.447) (1.108.072)	661.042 134.102 (96.085) (298.658)
Tax impact of the remeasurement of recoverability of deferred tax asset	-	(717.093)
Income tax charge/(credit)	921.670	(316.692)

The Bank is subject to income tax on taxable profits, at the rate of 12,5%.

Brought forward losses of only five years may be utilized.

Under certain conditions, interest may be exempt from income tax and be subject only to special contribution for defence at the rate of 30%.

In certain cases, dividends received from abroad may be subject to special contribution for defence at the rate of 17%. In addition, in certain cases, dividends received from other Cyprus tax resident companies may also be subject to special contribution for defence.

Gains on disposal of qualifying titles (including shares, bonds, debentures, rights thereon etc) are exempt from Cyprus income tax.

(b) Deferred income tax assets and liabilities

The movement in deferred income tax assets and liabilities during the year, without taking into consideration the offsetting of balances within the same tax jurisdiction, is as follows:

Deferred income tax liabilities

	evaluation of land and buildings €	Total €
At 1 January 2023	881.717	881.717

Profit or loss for the year	-	-
At 31 December 2024	881.717	881.717

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

15. INCOME TAX (continued)

(b) Deferred income tax assets and liabilities (continued)

Deferred income tax assets

	Tax losses €	Total €
At 1 January 2023 Charged to:	2.441.287	2.441.287
Profit or loss for the year	316.692	316.692
At 31 December 2023/1 January 2024	2.757.979	2.757.979
Credited to: Profit or loss for the year	(728.939)	(728.939)
At 31 December 2024	2.029.040	2.029.040

Deferred income tax assets are recognized for tax losses carried forward to the extent that the realisation of the related tax benefit through future taxable profits is probable. The assessment of the recognition of a deferred tax asset is a critical judgment, given the inherent uncertainties associated with projecting profitability over a long time period. The Bank performed its assessment for the recoverability of the deferred tax asset as at 31 December 2024 and 31 December 2023 taking into account the Bank's actual and historic performance, the key objectives of the Bank's strategy, the macroeconomic environment in Cyprus, the impact of tax legislations enacted as at the reporting date and the detailed financial business plan approved by the Board.

The financial projections have taken into account the key objectives of the Bank's strategy which are set out below:

- Further strengthening of the corporate banking services to boost revenue and fee generation as well as maximizing synergies with the NBG Group as an international hub;
- Embedding a holistic ESG framework across the Bank; and
- Maintain healthy liquidity and capital base positions.

The key assumptions taken into consideration, amongst others, include the following:

- Income generation on the back of synergies with the NBG Group;
- Sustainment of cost of risk supported by asset quality organic actions.

The above assumptions are based on both internal and external information for attributing a value to each key assumption in the deferred tax asset forecasts.

The internal key variables include, amongst others, the Bank's strategy, plans and planned actions for (i) expansion of certain business lines and income streams, (ii) capital and liquidity management, (iii) cost management, (iv) cost of funding and (v) pricing of deposits and loans.

External key variables mainly include the interest rate evolution which impacts the business activity of the Bank, the Cypriot and European macroeconomic conditions and any changes in the regulatory framework.

24. PROPERTY, PLANT AND EQUIPMENT (continued)

Fair value measurement of the Bank's freehold land and buildings

The Bank's land and buildings are stated at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. The fair value measurements of the Bank's land and buildings are performed by independent valuers not related to the Bank. The valuers have appropriate qualifications and recent experience in the fair value measurement of properties in the relevant locations. The fair value of the properties was determined using the market comparable approach that reflects recent transaction prices for similar properties and discounted cash flow approach that reflects the annual return or potential return of the investor from the property held. The fair value of the land and buildings has been determined by an independent valuer and approved by the parent bank NBG SA.

The Bank adopted a valuation technique using unobservable inputs. Accordingly, the fair value was classified as Level 3.

The valuation levels are defined as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1);
- Inputs other than quoted prices included within Level 1 that are observable for the asset either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2); and
- Inputs for the asset that are not based on observable market data (that is, unobservable inputs) (Level 3).

Details of the Bank's land and buildings and information about the fair value hierarchy as at 31 December are as follows:

	Quoted prices in active markets for identical assets	Significant other observable	Significant unobservable	
	(level 1)	inputs (level 2)	inputs (level 3)	Total
	2024	2024	2024	2024

25. RIGHT-OF-USE ASSET

This note provides information for leases where the Bank is a lessee. The Bank has no leases where it is the lessor.

(i) The Bank's leasing arrangements

The Banks leases various offices, branches, a saloon car and an apartment. Rental contracts are typically made for fixed periods of 2 years to 6 years, but may have extension options.

Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor. Leased assets may not be used as security for borrowing purposes.

(ii) Amounts recognised in the balance sheet

The balance sheet shows the following amounts relating to leases:

	2024	2023
Dight of use essets	€	€
Right-of-use assets Buildings	1.097.633	1.413.180
Cars	39.280	52.373
Total	1.136.913	1.465.553
Lease liabilities		
Current	391.890	389.496
Non-current	809.776	1.120.056
Total	1.201.666	1.509.552

During the year ended 31 December 2024, the Bank recognized one new lease contract relating to an apartment. In relation to the new lease contract the rental period is for two years and includes option to extend for further two years. The Bank has the right at any time after the expiry of the initial term to terminate the present rental agreements by providing three months' notice to the lessor.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

25. RIGHT-OF-USE ASSET (continued)

Amounts recognised in profit or loss

The income statement shows the following amounts relating to leases:

· · · · · · · · · · · · · · · · · · ·	2024	2023
	€	€
Depreciation charge of right-of-use assets		
Buildings	375.222	284.822
Cars	13.093	13.093
Total	388.315	297.915
Interest expense (Note 7)	45.785	37.075
Total	45.785	37.075

The total cash outflow for leases in 2024 was €413.345 (2023: €364.786).

26. STOCK OF PROPERTY

The carrying amount of stock of property is determined as the lower of cost and net realisable value. Impairment is recognised if the net realisable value is below the cost of the stock of property. During the year ended 31 December 2024 no impairment loss was recognised. At 31 December 2024, stock of €10.062.315 (2023: €10.009.757) is carried at cost. The stock of property includes residential properties and land (fields and plots).

The carrying amount of the stock of property is analysed in the tables below:

	2024 €	2023 €
Balance at 1 January Additions	10.009.757 52.558	9.950.000 59.757

	000.723.707	143.004.120

Pending litigations and claims

The Bank is defendant in certain claims and legal actions and proceedings arising in the ordinary course of business. These actions and proceedings are generally based on alleged violations of consumer protection, banking, employment and other laws. None of these actions and proceedings is individually material. The Bank establishes provisions for all litigations, for which it believes it is probable that a loss will be incurred and the amount of the loss can be reasonably estimated. These provisions may change from time to time, as appropriate, in light of additional information. For the cases for which a provision has not been recognized, management is not able to reasonably estimate possible losses, since the proceedings may last for many years, many of the proceedings are in early stages, there is uncertainty as to the likelihood of the final result, there is uncertainty as to the outcome of pending appeals and there are significant issues to be resolved. However, in the opinion of management, after consultation with legal counsel, the final outcome of these matters is not expected to have a material adverse effect on the Bank's Balance Sheet, Income Statement and Cash Flow Statement, taking into account that as at 31 December 2024 the Bank has provided for cases under litigation the amount of €127.000 (2023: €81.000).

37. RELATED PARTY TRANSACTIONS (continued)

Balances with related companies

The following balances were payable to related parties at the end of the reporting period:

	2024 €	2023 €
Deposits and other customer accounts		·
National Securities S.A related party under common control	11.223	11.593
NBG Management Services Limited - related party under common control	744.458	699.997
National Securities (Cyprus) Limited - subsidiary	1.072	1.352
	756.753	712.942

Deposits with and from related banks are presented in Note 20 to the financial statements.

Other transactions

- (i) During the year ended 31 December 2023, credit facilities amounting to €36 million were transferred to the Bank from NBG SA Cyprus Branch.
- (ii) Based on the "Agreement and Instrument Transfer" dated 28/03/2024, it was agreed that in exchange for good and valuable consideration comprising the Bank's issue and allotment of 1300 ordinary shares with nominal value €1,71 per share, all assets and liabilities of NBG SA − Cyprus Branch were to be transferred to the Bank. The transfer was completed on 2 April 2024. Main items transferred included credit facilities and deposits to customers as well as deposits from NBG SA. These amounted to €211million, €5 million and €210 million respectively. The amount of off-balance sheet items transferred to the Bank amounted to €436 million. This transaction included non-cash items amounting to €356.264 under balances with related banks.
- (iii) A lien agreement has been signed between the Bank and the Parent, in order to provide guarantee for (a) any exposure amount exceeding the Large Exposure Limit of the Bank and (b) full amount of shipping loans. As at 31 December 2024 this amount was €75 million which included full coverage of two shipping loans amounting to €45 million. As per lien agreement, the Bank is required to pay on a quarterly basis to its parent, NBG SA, a guarantee fee calculated as a percentage on the maximum amount of capital covered. The amount paid for 2024 amounted to €169.950.

	365.720	378.375
Total compensation	529.887	513.598

38. OPERATING ENVIRONMENT

Despite the many regional challenges and global uncertainties within 2024 the Cypriot economy has demonstrated strong resilience with the GDP growth rate reaching 3.4%, driven by strong economic activity in professional services, information and communication, tourism and construction but also drawing support from increased domestic demand and labor market stability.

Public debt has continued to be on a declining trend estimated at around 65% of GDP. Cyprus' fiscal performance and robust growth performance has been acknowledged by the rating agencies, exhibited by the fact that Cyprus has been upgraded by the major rating agencies 3 notches above investment grade.

Inflation has stabilized at 1.9% in comparison to the 4% for year 2023 and unemployment has been on a declining trend reaching 4.5% in the last quarter from 5.5% in the last quarter of 2023.

The Cyprus banking sector continues to focus on reducing the non-performing exposures being around 6.6% of gross loans at the end of November 2024 as per the Central Bank of Cyprus statistics while the coverage ratio of provisions stood at 62% showing the efforts to further strengthen their balance sheets for absorbing potential shocks.

The Bank remains focused within this challenging environment to grow with high quality lending focused on selected industries in line with the Bank's target risk profile while at the same time monitoring potential escalation or deterioration in the geopolitical situation. The digital and green transitions are within the main priorities of the Bank, in order to safeguard its strength, durability and competitiveness.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

39. RISK MANAGEMENT

The Bank's activities expose it to a variety of financial risks: credit risk, market risk (including currency risk and interest rate risk) and liquidity risk. The Bank's overall risk management policies focus on the unpredictability of financial markets and seek to minimise the potential adverse effects on the Bank's financial performance, financial position and cash flows.

a) Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Bank. Credit risk arises mainly from loans and advances to banks, customers and loan commitments, but can also arise from financial guarantees, investments in debt securities and other exposures resulting from its trading activities including derivatives, other financial assets and balances with other banks.

The Bank has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Bank's exposure and the credit ratings of its counterparties are regularly monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits approved by the Bank and which are reviewed and approved at least on an annual basis.

The loan portfolio is assessed on the basis of customer creditworthiness, the sector of the economy in which the customer operates and the country of operation.

Credit concentration risk

Credit concentration risk arises from exposures to each counterparty, groups of connected counterparties, and counterparties in the same economic sector, geographic region or from the same activity. The following categories of credit concentration risk are recognized by the Bank:

- Single-name concentrations (including group of connected clients);
- Industry concentrations;
- Geographical concentrations;
- Collateral and guarantees concentration.

For the purposes of managing and monitoring concentration risks the Bank has established appropriate limits, a monitoring and reporting framework as well as appropriate measures and methodologies for the allocation of capital as mitigant.

Maximum exposure to credit risk and collateral and other credit enhancements

The main types of collateral obtained by the Bank for loans and advances to customers are mortgages of properties, blocked deposits, bank guarantees, pledges of equity securities of public companies, fixed and floating charges over corporate assets, assignment of life insurance policies and personal and corporate guarantees.

Collateral held as security for other financial assets is determined by the nature of the instrument. Debt securities and other eligible bills are generally unsecured.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

39. RISK MANAGEMENT (continued)

a) Credit risk (continued)

Forborne exposures

The credit tools commonly used by the Bank to manage liquidity problems faced by its clients in the repayment of their debts is the restructuring of their finances by renegotiating the current terms of the loan agreement.

Regulation EU no. 575/2013 established the framework for prudential requirements on the management by credit institutions of loans arrears and non-performing loans.

The European Banking Authority (EBA) published in 2014 its technical standards with respect to non-performing and forborne exposures. Exposures include all debt instruments (loans and advances and debt securities) and off-balance sheet exposures, except those held for trading exposures.

According to the EBA technical standards, forborne exposures are those debt contracts in respect of which forbearance measures have been extended. Forbearance measures consist of concessions towards a debtor (including part of total refinancing of a debt contract) which aim to address existing or anticipated difficulties on the part of the debtor to service debt in accordance with the current repayment schedule. Changes in the terms and conditions of a contract that do not occur because the customer is not able to meet the terms and conditions of the contract due to financial difficulties do not constitute forbearance measures.

The most significant prerequisite for the forbearance of an exposure is the existence of customer repayment ability i.e. the customer is viable.

The forbearance measures to be taken and their duration thereof are determined on the basis of specific customer information, based on the prevailing economic conditions and in accordance with relevant legislation or regulatory Directives.

Every effort is being taken by the Bank for the proper assessment of the new repayment schedule on the basis of the forbearance measures, in order to avoid a new default.

The below tables present the Bank's forborne exposures in accordance with the EBA technical standards, the tangible and measurable collateral and other credit enhancements held and the net exposure to credit risk.

39. RISK MANAGEMENT (continued)

a) Credit risk (continued)

Other financial assets at amortised cost

Other financial assets at amortised cost include loans and advances to customers, financial assets at amortised costs, cash and balances with Central Bank of Cyprus, Deposits with other and related banks.

The Bank considers the probability of default upon initial recognition of financial asset at amortised cost and whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period. To assess whether there is a significant increase in credit risk the Bank compares the risk of a default occurring on the asset as at the reporting date with the risk of default as at the date of initial recognition. It considers available reasonable and supportive forwarding-looking information. Especially the following indicators are incorporated:

- internal credit rating;
- external credit rating (as far as available);
- actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant change to the borrower's ability to meet its obligations;
- actual or expected significant changes in the operating results of the borrower/counterparty;
- significant increases in credit risk on other financial instruments of the same borrower/counterparty;
- significant changes in the value of the collateral supporting the obligation or in the quality of third-party guarantees or credit enhancements; and
- significant changes in the expected performance and behaviour of the borrower/counterparty, including changes in the payment status of counterparty and changes in the operating results of the borrower.

Macroeconomic information (such as market interest rates or growth rates) is incorporated as part of the internal rating model. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables. The Bank has identified the GDP and the unemployment rate to be the most relevant factors, and accordingly adjusts the historical loss rates based on expected changes in these factors.

Regardless of the analysis above, a significant increase in credit risk is presumed if a debtor is more than 30 days past due in making a contractual payment.

A default on a financial asset is when the counterparty fails to make contractual payments within 90 days of when they fall due.

Financial assets are written off when there is no reasonable expectation of recovery, such as a debtor failing to engage in a repayment plan with the Bank. Where loans or receivables have been written off, the Bank continues to engage in enforcement activity to attempt to recover the receivable due. Where recoveries are made, these are recognised in profit or loss.

The Bank uses three categories for loans, receivables, other receivables, debt securities at amortised cost which reflect their credit risk and how the loss provision is determined for each of those categories. These internal credit risk ratings are aligned to external credit rating companies, such as Moody's and Fitch.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

39. RISK MANAGEMENT (continued)

a) Credit risk (continued)

Credit quality of loans and other advances to customers

A summary of the assumptions underpinning the Company's expected credit loss model is as follows:

Category	Company definition of category	Basis for recognition of	Basis for calculation
Performing	Counterparties have a low risk of default and a strong capacity to meet contractual cash flows.	Expected credit loss provision Stage 1: 12 month expected losses. Where the expected lifetime of an asset is less than 12 months, expected losses are measured at its expected lifetime.	Gross carrying amount.
Underperforming	Counterparties for which there is a significant increase in credit risk; as significant increase in credit risk is presumed if interest and/or principal repayments are 30 days past due as well as any breach on the recorded 12 month and lifetime PD thresholds and ratings downgrades. In addition the forbearance status is considered.	Stage 2: Lifetime expected losses	Gross carrying amount.
Non-performing	Interest and/or principal repayments are 90 days past due. Also the contamination rule (pulling effect) is in place with regards to corporate portfolio.	Stage 3: Lifetime expected losses	Amortised cost carrying amount (net of credit allowance).

Over the term of the loans and advances to customers, financial assets at amortised cost, cash and balance with Central Bank of Cyprus, Deposits with other and related banks, the Bank accounts for its credit risk by appropriately providing for expected credit losses on a timely basis. In calculating the expected credit loss rates, the Bank considers historical loss rates for each category of customers and adjusts for forward looking macroeconomic data.

The Bank provides for credit losses against loans and advances to customers, financial assets at amortised cost, cash and balances with Central Bank of Cyprus, Deposits with other and related banks. The following tables contain an analysis of the credit risk exposure of each class of financial instruments for which an ECL allowance is recognised. The gross carrying amounts below also represent the Bank's maximum exposure to credit risk on these assets as at 31 December 2024 and 31 December 2023.

The following tables analyse the Bank's loans and advances in accordance with internal credit rating category.

39. RISK MANAGEMENT (continued)

a) Credit risk (continued)

Credit related commitments

The primary purpose of these instruments is to ensure that funds are available to a borrower as required. Guarantees which represent irrevocable assurances that the Bank will make payments in the event that a counterparty cannot meet its obligations to third parties, carry the same credit risk as loans and advances. Commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans or guarantees. With respect to credit risk on commitments to extend credit, the Bank is potentially exposed to loss in an amount equal to the total unused commitments, if the unused amounts were to be drawn down.

The Bank monitors the term to maturity of credit related commitments, because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments.

An analysis of credit related commitments by credit quality based on credit risk grades at 31 December 2024 is as follows:

	Stage 1	Stage 2	Stage 3	
	(12-months	(lifetime	(lifetime ECL for credit

39. RISK MANAGEMENT (continued)

b) Liquidity risk

Liquidity risk is the risk that the Bank is unable to meet current and future payments obligations as and when they fall due. This risk includes the possibility that the Bank may have to raise funding at a higher cost or sell assets at a discount.

Bank assets are mainly funded by deposits. The maturity of the deposits is actively monitored in order to avoid concentration of funding maturities at any point in time. The responsibility for the management of liquidity rests with the treasury department and the operations and support division.

Ultimate responsibility for liquidity risk management rests with the Board of Directors, which has built an appropriate liquidity risk management framework for the management of the Bank's short, medium and long-term funding and liquidity requirements, in order to also ensure compliance with the limits set by the applicable regulatory limits.

Analysis of financial assets and financial liabilities by remaining contractual maturity

The following liquidity tables analyse the financial assets and financial liabilities of the Bank into relevant maturity groupings based on their remaining contractual maturity at 31 December. The amounts disclosed in the table for financial liabilities are based on undiscounted cash flows.

Financial assets

The financial assets are presented on the same basis as the one provided to the management of the Bank and to the Central Bank of Cyprus, as this presentation is considered to be the most appropriate presentation of the Bank's liquidity. Accordingly, the analysis of the financial assets does not include any interest receivable cash flows.

Current accounts, overdrafts and amounts in arrears are included within the first maturity time band which reflects their contractual maturity. All other loans and advances to customers are analysed according to their contractual repayment schedule.

Balances with banks are analysed in the time bands according to the number of days remaining from 31 December until their contractual maturity date. Financial assets with no contractual maturity (i.e. equity securities) are included in the "over 5 years" time band. The investments are classified in the relevant time band according to their contractual maturity.

Financial liabilities

All financial liabilities for the repayment of which notice is required, are included in the relevant time bands as if notice had been given on 31 December. Fixed deposits are classified in time bands based on their contractual maturity.

Contingent liabilities and commitments

The limits of loans and advances are commitments to provide credit to customers. The limits are granted for predetermined periods and can be cancelled by the Bank after giving relevant notice to the customers. Thus, the unutilised credit facilities are included within the first maturity time band.

c) Market risk

Market risk is the risk of loss from adverse changes in market prices. The Bank is exposed primarily to financial risks emanating from changes in foreign currency exchange rates and interest rates.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. It arises as a result of timing differences on the interest rate repricing of assets and liabilities. The Bank monitors on a continuous basis the interest rate movements and the repricing or maturity structure of its assets and liabilities.

Interest rate risk is measured using interest rate sensitivity gap analysis where the difference between assets and liabilities repricing in each time band is calculated, separately for each currency. The difference is then multiplied with the assumed change in interest rates for the period from the repricing date until twelve months from the date of the analysis, in order to find the annual impact on earnings of any changes in interest rates for the next twelve months for each currency.

Sensitivity analysis

The table below indicates the effect on the Bank's net profit and equity, if interest rates for the main currencies were 200 basis points higher (2023: 200 basis points). A positive number below indicates an increase in profit. For a decrease of 200 basis points there would be an equal and opposite impact on the net profit and equity.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

39. RISK MANAGEMENT (continued)

c) Market risk (continued)

Sensitivity analysis (continued)

	Euro €'000	USD Dollars €'000	British Pound €'000	Other currencies €'000	Total €'000
Change in interest rates 2024					
+200 b.p. in all currencies	9.224	303	28	(2)	9.553
2023 +200 b.p. in all currencies	394	106	28	(22)	506

Currency risk

Currency risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. It arises from an open position in a foreign currency, creating an exposure to a change in the relevant exchange rate. This may arise from the holding of financial assets in one currency funded by liabilities in another currency.

In order to manage currency risk, the Bank has approved open position limits for each currency. Adherence to the limits is monitored on a daily basis by the treasury department and the operations and support division.

The table below sets out the Bank's foreign exchange risk resulting from its open foreign exchange positions. A positive number below indicates an increase in profit/equity. For a corresponding decrease there would be an equal and opposite impact on profit/equity.

	Open position €'000	Change in exchange rate %	Impact on net profit/ equity €'000

Other currencies	465	+5	19

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

39. RISK MANAGEMENT (continued)

d) Operational risk

Operational risk is the risk of loss arising from fraud, error, omission, systems failure or other external events. The Bank manages operational risk through the various established policies, limits and written procedures. The Risk Management Unit, in cooperation with all units and divisions, is responsible for managing the Bank's operational risk. Furthermore, this is supported by the reviews undertaken by the Internal Audit division.

e) Regulatory risk

The operations of the Bank are supervised by the Central Bank of Cyprus. Licensed banking institutions in Cyprus have to comply with the requirements of both the European Union and Cyprus regulatory frameworks. Legal or regulatory changes may be introduced in the future either by the European Union or by the Central Bank of Cyprus which may adversely affect the results and financial position of the Bank.

f) Fair value of financial instruments

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

With reference to the above, the carrying amounts of financial assets and financial liabilities recognised at amortised cost in the financial statements approximate their fair values.

Fair value measurements recognised in the statement of financial position

The Bank uses the following hierarchy for determining and disclosing fair value:

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The following is a description of the determination of fair value for financial instruments which are recorded at fair value using valuation techniques.

- The fair values of equity investments at fair value through other comprehensive income that are traded on an active market are determined with reference to quoted market prices. Unquoted equity securities are valued using valuation techniques that include inputs from non-observable data. The non-observable inputs to the models for the valuation of unquoted equity investments include assumptions regarding the future financial performance of the investee, its risk profile, and economic assumptions regarding the industry in which the investee operates.
- The fair values of derivative instruments are determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions and dealer quotes for similar instruments.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

39. RISK MANAGEMENT (continued)

f) Fair value of financial instruments (continued)

The following table provides the Bank's financial instruments that are measured subsequent to initial recognition at fair value, grouped into Levels 1 to 3 based on the degree to which the fair value is observable.

	Level 1 €	Level 2 €	Level 3 €	Total €

The cash and balances with central bank and deposits due from and due to banks are financial instruments whose carrying value is a reasonable approximation of fair value, because they are mostly short-term in nature.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS Year ended 31 December 2024

40. CAPITAL MANAGEMENT

The Bank manages its capital to ensure that the Bank complies with regulatory capital requirements and that the Bank maintains adequate capital ratios in order to support its business and to maximise shareholders' value.

As from 1 January 2014, the new Capital Requirements Regulation (CRR) and amended Capital Requirements Directive IV (CRD IV) became effective, comprising the European regulatory package designed to transpose the new capital, liquidity and leverage standards of Basel III into the European Union's legal framework. CRR establishes the prudential requirements for capital, liquidity and leverage that entities need to abide by. It was immediately binding on all EU member states. CRD IV governs access to deposit-taking activities, internal governance arrangements including remuneration, board composition and transparency. Unlike the CRR, CRD IV needs to be transposed into national laws, which allows national regulators to impose additional capital buffer requirements. CRR introduced significant changes in the prudential regulatory regime applicable to banks including amended minimum capital adequacy ratios, changes to the definition of capital and the calculation of risk weighted assets and the introduction of new measures relating to leverage, liquidity and funding.

On 7 June 2019, the EU banking reform package has been published in the Official Journal of the European Union which includes the Directive (EU) 2019/878 (CRD V) and the Regulation (EU) 2019/876 (CRR II), entered into force on 27 June 2019. The Regulation (EU) 2019/876 (CRR II) includes a number of amendments regarding the leverage ratio, the net stable funding ratio, requirements for own funds and eligible liabilities, counterparty credit risk, market risk, exposures to central counterparties, exposures to collective investment undertakings, large exposures, reporting and disclosure requirement.

In June 2024, Regulation 2024/1623/EU ('CRR III'), amending Regulation 575/2013/EU, and Directive 2024/1619/EU ('CRD VI') of the European Parliament and of the Council of 31 May 2024, amending Regulation 575/2013/EU and Directive 2013/36/EU, respectively, were published in the Official Journal of the European Union. The revised CRR (CRR3 III) will, in general, became applicable on from 1 January 2025, with a transitional period envisaged for certain rules set out therein. EU member states will need to transpose the revised CRD IVI (CRD6) into national law, to be applicable as from 11 January 2026.

During 2024, the Bank's Total Capital Ratio was at all times above the applicable regulatory thresholds.

41. EVENTS AFTER THE REPORTING PERIOD

There are no material events after the reporting period, which have a bearing on the understanding of financial statements.

Independent auditor's report on pages 7 to 11.
